MYOB

BI4Cloud

Profit & Loss

Sales & Inventory

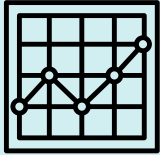

Job Profitability

Job Budgets

Make better business decisions with complete up-to-date data visibility

ABSS BI4Cloud suits all businesses, whether it's small business owners to larger organizations. Free yourself from spreadsheets today and never miss important exceptions for your business, even when you're on the move!

Sales & Inventory

- Sales and margins by prior periods or years
- Track inventory against sales history

Job Analysis

- Budget jobs by month or the whole job
- Report job actuals to budget, Jobs P&L
- Manage job WIP and estimates to complete
- Insights on all active jobs regardless of their stage across financial years

Divisional Analysis

- Report P&L by categories and combine multiple company files
- Setup custom lists to generate comprehensive divisional P&L reports with actuals vs budget that you can drill right down to transaction level

Create and Share Favourites

- Change columns, sorting or group and save them as your own or share them with other users in your team

Dashboards & Visualisations

- Create favourites with the summary information of charts and use them to make a dashboard on your own canvas

Automate Reports

- Schedule reports daily, weekly or monthly and have them automatically emailed to users
- You can also send them to yourself for automatic processing

ADDITIONAL...

Customise Reports

It's all a simple point and click. Sort order of reports, by group. Set special filters. Add or remove columns, save your new report to reuse and share with other users or schedule to auto email daily, weekly or monthly.

Export to Excel and CSV

Export to Excel and CSV formats to further work on formatting your report data.

Alerts

Alerts are simply email reports that are sent when one or more values that reach a particular threshold, what we call numeric filters.
